DISCOVER HOW MEDICINE AND SCIENCE ARE PUSHING BACK THE BOUNDARIES OF THE DISEASES OF AGEING

INVITATION TO HEAR FROM WORLD EXPERTS AT THE 3rd ANNUAL ANTI-AGEING CONFERENCE LONDON :PROGRAMME
THE INTERNATIONAL SYMPOSIUM ON REGENERATIVE MEDICINE - SEPTEMBER 15TH-17TH 2006

London, 1 June 2006: Anti-Ageing Conference London (<http://www.antiageingconference.com>) today announced its speaker programme – the largest gathering of the world’s pre-eminent medical speakers on the subject of anti-ageing health and regenerative medicine ever to be assembled in London.

The 3rd Anti-Ageing Conference (AACL), will be held at the Royal Society of Medicine in London from the 15-17 September 2006.

This event offers a unique opportunity to learn from scientists and physicians about the latest medical advances from what some may consider controversial, to the proven and new treatments for the diseases of ageing.

This event is of importance to all medical professionals who wish to be cognascent on the latest medical and scientific developments in anti-ageing and rejuvenatory medicine from around globe.

It is of particular importance to scientists, nutritionists, gerontologists, chiropractors, pharmacists, pharmaceutical chemists and research specialists, nursing practitioners, naturopathic doctors, dentists, bariatricians and weight management specialists.

Among the speakers are world-renowned experts who have driven the global debate on anti-ageing medicine including Dr Robert Goldman, Chairman, American Academy of Anti-Aging Medicine and Dr Ronald Klatz, Founding President, American Academy of Anti-Aging Medicine; Professor Imre Zs-Nagy, Professor John Ionescu, Dr Michael Klentze, Mr Robert Klein and Professor Irving Weissman.

Our keynote speaker on Sunday is Deepak Chopra, one of the world’s leaders in the field of mind body medicine and Auvyredic medicine.

As well as the opportunity to hear from these world experts and put questions to our speaker panel, this event provides a unique networking opportunity for healthcare professionals. All delegates receive a high-quality bound conference manual including speaker presentations and biographical materials.

The fee also includes a buffet lunch, on all three days, refreshments and an invitation to the conference cocktail reception. In addition the latest anti-ageing products from around the world will be on show in the exhibition hall.

This prestigious scientific event (<http://www.antiageingconference.com>) will be introduced by Heather Bird-Tchenguz MBA, Chairperson, AAAC; Founder and President of HB Health; Director of the World Academy of Anti-Aging Medicine; Board Member, European Society of Anti-Aging Medicine and Director, British Society of Anti-Ageing Medicine.

Heather Bird-Tchenguz comments: "In most societies around the globe people are living longer so the importance of healthy ageing has never been greater.

It is possible for older people to live full and healthy lives well into the latter part of their years but in most cases this does not happen because they and the medical professional are not always aware of the new opportunities that are available to them through anti-ageing medicine. That is what this conference is all about and why this knowledge is so vital."

The speaker programme for Anti-Ageing London 2006 (<http://www.antiageingconference.com>) is as follows:

****Friday, 15 September – Regenerative and Preventative Medicine****

Prof Larry Benowitz - (TBA)

Prof Geoffrey Raisman: Spinal cord injury
