

New, Free Software Utility Protects, Repairs and Optimizes PCs

Submitted by: IObit

Wednesday, 20 June 2007

Boston, Mass. / June 20, 2007 - A new, free all-in-one system utility helps protect, repair and optimize computers with a single click of the mouse.

"There's no longer a need to rush and call a technician when your computer fails to perform," says Hugo Dong, President of IObit.

The product is called Advanced WindowsCare v2 Personal. IObit (<http://www.iobit.com>), the software company that developed it, says with computer technology becoming increasingly complex, it's vital that users maintain and optimize their PCs on a regular basis to keep computers free from Adware and Spyware.

"We know it hard for many PC users to access sophisticated and various Windows optimization tools to enhance their computer's performance," says Dong. "This freeware is designed to be the first point of call in solving these issues quickly and easily."

Advanced WindowsCare Personal is user-friendly and offers four major benefits:

1. Defends Windows: Scan and remove Spyware and Adware with the latest definition; prevent Spyware, hijackers and bad websites from being installed, erase the history of all activities in computer including traces of online site visit activity.
2. Cleans Windows: Boost system performance by deep scanning and cleaning out all missing, unwanted, obsolete and corrupt registry entries and junk files.
3. Keeps peak performance: Fully optimize Windows for ultimate system performance and top Internet speed, based on how users use computer and what kind of network they have.
4. Fixes system errors: Repair system configurations, eliminate system bottlenecks and prevent crashes, keeping your PC stable and roaring at peak efficiency.

About Advanced WindowsCare Personal: Advanced WindowsCare Personal works on Windows Vista/ XP/ 2000, multi-language supported. It is 100% clean and safe free of adware and spyware.
