IP telephony vendor enjoys a 21% increase on its record-breaking Q1 figures

London, UK, 7th August 2007 - Swyx a market-leading vendor of IP telephony solutions has today announced its Q2 2007 results. Sales revenues for April to June 2007 increased in its core markets over 21% on its Q1 results, with key growth areas in Germany, UK, Netherlands and Scandinavia.

Swyx CEO Guenter Junk commented, "We are delighted with the results that reflect the continued demand for software-based IP telephony and Swyx's ability to meet the current and anticipated demands of end-users. In line with demand, our commitment to both customers and sales partners is to continue with a major investment in product developments in areas such as FMC (Fixed Mobile Convergence) and hosted offerings. These results demonstrate how this strategy is paying dividends for both our sales partners and customers who can count on Swyx as a communications platform that will continue to evolve as they do".

He continues, "Our success during this period was also recognised by third parties including Germany's Internet industry association 'ECO' which recognised Swyx's work in the hosted arena, with the "ASP business customer of the year" award, recognised within the industry as the equivalent of the 'Internet Oscars'. This again demonstrates that we are on the right course for further growth and development during the remainder of 2007."

Editor's notes:

About Swyx:

The Communication Engine

Always ready to challenge the market, Swyx develops software based IP communication solutions that continually push the boundaries whilst maintaining its core belief that technology must always deliver tangible business value and productivity for clients.

Renowned for product innovation, Swyx aims to continually delight its customers and business partners by providing the best possible products and services to help make them more competitive in their markets.

Established in 1999 and headquartered in Dortmund, Germany, Swyx now has offices across Europe. Today the company is recognised as the market leader for IP communication in Europe and has enabled thousands of businesses to take advantage of the benefits of IP communication and associated applications.

An easy-to-install, easy-to-maintain software-based system, SwyxWare is The Communication Engine designed

to drive a company forward. Based around familiar Microsoft® Windows® applications, the Swyx solution is designed to integrate perfectly with existing business software, including all financial and business process management tools. It offers all the agility of a business-class communication solution with the flexibility to match – and to grow with a company’s specific needs. Powerful business communication, that is simple, quick and easy to set up and manage, giving businesses full control, and making them more responsive to the needs of its customers, wherever they are.
