Bailey Solutions library computer systems are moving up

Bailey Solutions, UK based provider of information and library management software (<http://www.baileysolutions.co.uk/bs/home.asp>) is having a busy summer. Due to expansion the company is moving to larger premises in Hove and is launching a brand new image and web site at the same time. If that wasn't enough the company is also working with UK Trade & Investment (UKTI) to increase its overseas sales and is making in-roads to Europe and beyond. In addition the company has opened an office in New York as a base for US operations.

The move to the old perfume factory behind Hove station with excellent transport links creates an ideal base for further company growth. Bailey Solutions incorporated in 2002 and is now is the fastest growing mid market library and information system vendor based in the UK. With over 170 clients, the company is the market leader in the legal sector and has customers in local and national government, workplace and college libraries. The company is unique in providing an integrated suite of products for library management, knowledge management and research tracking.

Penny Bailey, Managing Director of Bailey Solutions, comments: "Our old product literature and web site had all been created on an ad hoc basis and we felt the office re-location was an ideal opportunity to revamp our whole image. The new web site is structured to accommodate growth for international business, while at the same time retaining the personal touch. The new office is a wonderfully light and airy space and we are investing on refurbishing it to a high standard to retain and attract personnel."
