

Webinar from MEGA will show how to measure the maturity of BPM initiatives

Submitted by: Pattison Mitchell Associates

Thursday, 31 July 2008

London – July 31, 2008 – For immediate release:

MEGA will present a webinar on August 5 entitled “Measure the BPM maturity and agility of your organisation”. Part of a summer series of webinars from the company, there is no charge for participation; delegates may register now by going to www.mega.com/index.asp/l/en/c/event

Presented by a key consultant at MEGA and starting at 3:00pm, the August 5th webinar will include: a brief summary of the topics covered so far in the series; an exploration of long-term project phases and possible outcomes; the elements needed to re-vitalise a BPM initiative; the steps of the MEGA maturity model and how each one contributes towards an optimal outcome; and the necessary components to improve overall enterprise agility.

Aimed at CIOs, COOs, IT executives, business analysts, enterprise and solution architects in many industries the webinar series is presented by MEGA, a major modelling supplier in the business process management (BPM) global market. The webinars provide a valuable opportunity to review, discuss and learn more about well proven principles and best practice in BPM and related disciplines, in an impartial and objective environment.

The other MEGA BPM Web conferences in the series will be held on August 19, September 2 and 18.

ABOUT MEGA

MEGA has fifteen years experience in applying business process analysis and design in many industry sectors and major corporations. The company’s consultants’ expertise is complemented by the MEGA Modeling Suite, a comprehensive software solution. The suite helps organisations analyse their business so they can anticipate and take the initiative on trends, and manage business or market changes. It provides a complete view of the structure and processes within the organisation, and the technology that supports it. Combined with consultancy and the right methodology, the software helps organisations control information at the enterprise level, align business goals with IT resources, and reduce unknowns, delays, and costs.

MEGA (www.mega.com) offers the MEGA Modeling Suite for enterprise architecture and business process analysis, and the MEGA GRC Suite for governance, risk, and compliance. It is a privately-held company, founded in 1991, with 50,000 software licenses worldwide. European customers include Allianz, AXA, British American Tobacco, Direct TV, LCL Le Crédit Lyonnais, Renault Nissan, Société Générale and Unicredit.
