---

London – August 13, 2008 – For immediate release:

MEGA will present a webinar on August 19 entitled “You can’t change what you can’t see, or, how to support change management”. Part of a summer series of webinars from the company, there is no charge for participation; delegates may register now by going to [www.mega.com/index.asp//en/c/event](http://www.mega.com/index.asp//en/c/event)

Presented by a key consultant at MEGA and starting at 3:00pm, the August 19th webinar will include: a brief summary of the topics covered so far in the series; a review of the nature of change and its implications within an enterprise; an exploration of the close relationship between change management and project management, and how these two practices work together; an outline of the key steps in the change project and how these relate to business process management (BPM); a demonstration of the role of modelling in BPM initiatives; and an examination of the essential steps to ensure BPM supports effective change, from need identification to final implementation.

Aimed at CIOs, COOs, IT executives, business analysts, enterprise and solution architects in many industries the webinar series is presented by MEGA, a major modelling supplier in the global BPM market. The webinars provide a valuable opportunity to review, discuss and learn more about well proven principles and best practice in BPM and related disciplines, in an impartial and objective environment.

The two remaining MEGA BPM Web conferences in the series will be held on September 2 and 18.

## ABOUT MEGA

MEGA has seventeen years experience in applying business process analysis and design in many industry sectors and major corporations. The company’s consultants’ expertise is complemented by the MEGA Modeling Suite, a comprehensive software solution. The suite helps organisations analyse their business so they can anticipate and take the initiative on trends, and manage business or market changes. It provides a complete view of the structure and processes within the organisation, and the technology that supports it. Combined with consultancy and the right methodology, the software helps organisations control information at the enterprise level, align business goals with IT resources, and reduce unknowns, delays, and costs.

MEGA ([www.mega.com](http://www.mega.com)) offers the MEGA Modeling Suite for enterprise architecture and business process analysis, and the MEGA GRC Suite for governance, risk, and compliance. It is a privately-held company, founded in 1991, with 50,000 software licenses worldwide. European customers include Allianz, AXA, British American Tobacco, Direct TV, LCL Le Crédit Lyonnais, Renault Nissan, Société Générale and Unicredit.
