

Luxury, bespoke holiday provider 'Amazon Creek' launches for this winter season!

Submitted by: Amazon Creek

Monday, 10 November 2008

Amazon Creek is an exciting company providing excellence in luxury holidays, with an emphasis on personal service and tailor made activities.

Our stunning, privately owned ski chalets situated in the Chamonix Mont-Blanc valley have been designed by us based on personal experience and a passion for skiing. Every step of the build process has been considered to provide guests with first class facilities and services during their stay with us.

Under floor heating, bathrooms brimming with L'Occitane products and the softest towelling robes are standard. Large living spaces and luxury bedrooms with a private fleet of chauffeured Land Rovers transport guests to the slopes and the Boutiques of Chamonix town. A cinema room, with its collection of up to date DVDs and comfortable seating is a haven for children whilst the adults enjoy the spacious spa and its facilities including a hamman steam room, sauna and sunken jacuzzi for ten.

In addition to luxurious accommodation, the offering has to stand out from the competition and that's why Amazon Creek offer guests complimentary 'ski programme' with a personal instructor, whose skills are renowned in the valley. In recent years, Chamonix has become recognised as one of the leading European winter sports destinations. Breathtaking scenery complements the skiing and snowboarding for all levels, with some of the most demanding descents for the true 'powder hounds' looking for exhilarating Alpine off-piste. From panoramic skiing of Le Brevent and La Flegere to the wonderful wide-open spaces of Les Grands Montets.

The future for Amazon Creek is exciting and promises more properties in hand picked locations including beachfront villas in Sete, an impressive villa in Corsica and water's edge villas Antigua. Like any luxury holiday provider, our portfolio wouldn't be complete without 77ft custom built sailing yachts, so we have two of them, the first ready to sail in Summer 2009.
