

40 years of Sound Service

Submitted by: Sound Service (Oxford) Ltd

Tuesday, 13 January 2009

From its humble beginnings supplying car soundproofing in 1969, Sound Service has become one of the best known and respected names for soundproofing materials in the UK.

Based at Crawley Mill in the Cotswold countryside the team of dedicated technical staff ensure you are offered the latest in soundproofing design and innovation and this is partly why they have survived the test of time in a very competitive marketplace.

Architects and designers as well as alternative soundproofing companies purchase products from Sound Service as they recognise the quality of materials sold.

In 2008 Sound Service created its Green Policy and does all it can to reduce its carbon footprint from manufacture to final delivery to its customers.

The end of 2008 saw the launch of the company's shopping cart. www.soundproofing-direct.com where customers can now order over 60% of the main product range with more products being added daily.

A survey conducted by Mori has shown that nearly half of the UK's population feels their life suffers due to noise when they are at home. Sound Service has developed a range of D.I.Y soundproofing systems for its customers to cover all skills and noise problems. These can be seen at www.keepitquiet.co.uk

When shopping around or thinking of working with a new soundproofing supplier Sound Service would ask this, have they been selling their products for 40 years?

Don't put up with the noise any longer, give Sound Service a call, discuss your problem and see how they can help you.

Call 0845 363 7131 or visit their website www.soundservice.co.uk for brochures and full product information.
