

MenoHerb hailed by report into herbal remedies for menopause

Submitted by: Pegasus Public Relations (Worthing)

Thursday, 15 January 2009

MenoHerb has been highlighted in a recent report on herbal treatments for menopause published in the *Drugs and Therapeutics Bulletin** as an example of how all such products should be licensed and sold.

MenoHerb has been assessed for safety and quality by the UK Medicines and Healthcare products Regulatory Agency (MHRA) and also contains an approved patient information leaflet. The report advised that patients should always try to identify and purchase a herbal product carrying a product licence (PL) number, or a traditional herbal remedy (THR) number on the product label, as MenoHerb does.

MenoHerb is a traditional herbal remedy (THR) used for the relief of symptoms of the menopause, containing Black Cohosh, and was mentioned numerous times in the report as a benchmark for such products.

MenoHerb is available from Boots, Superdrug and all good pharmacies for further information see www.menoherb.co.uk. If you require case studies of women who have used MenoHerb, interviews with experts from Schwabe, additional information or product samples, please contact Pegasus PR on 01903 821550, or email rgobel@pegasuspr.co.uk or sjones@pegasuspr.co.uk
