

University of Ulster Launches Online Courses for Architecture

Submitted by: Paul Stewart

Wednesday, 4 February 2009

The University of Ulster has announced the launch of its online series of courses entitled 'Visualisation for Architecture'.

Three new courses have been launched:

- 3D Solid Modelling for Architecture
- 3D Max Design for Architecture
- Photoshop for Architecture

The courses are designed with the busy architectural professional in mind. 100% online delivery offers flexibility of learning at your own pace with the benefits of having access to different media to support your learning style.

Participants are taught through the university's Virtual Learning Environment, WebCT. They have access to a full range of course materials including written notes, video demonstrations and real-world examples and will be in regular contact with their course tutor.

All courses are supported by skilled professionals who have experience teaching these courses within academic and professional settings.

The courses award credit towards Continuing Professional Development and an optional assessment is available to measure competency.

For more information on the courses, or to book a place, log on to:
