Tuesday, 10 February 2009

Altrincham, UK, 6 Feb 2009

Interact Intranet (<http://www.interact-intranet.co.uk>), an out-of-the-box intranet solution developed by Odyssey Interactive Ltd, has been nominated for Intranet Journal's Product of the Year Award for 2009. Placed in the Intranet Design Software category, Interact Intranet secured the nomination due to its easy to use, intuitive interface, feature rich business applications (<http://www.interact-intranet.co.uk/modules.asp?menu=6>), collaborative tools and its extensive features.

Intranet Journal has a tradition of recognizing and honouring the best IT products through its Product of the Year Awards. For the winners, these annual awards are a mark of distinction and symbol of achievement in a crowded, highly competitive market.

Odyssey Interactive Ltd, a leading intranet software provider since 1996, recently released Interact Version 4.0 which has been developed to take advantage of the latest technologies as used by websites like Facebook, MySpace and Amazon. Built entirely in .NET, Interact 4.0 has been two years in development and is the latest version of Odyssey's popular Interact platform. The standard system is a fully accessible 'AA' compliant intranet, exceeding the Disability Discrimination Act (DDA) guidelines for web accessibility.

Commenting on the nomination, Nigel Danson Managing Director at Odyssey Interactive Ltd, said:

"We are delighted to have been nominated for this award; it is an honour to be recognised by readers of Intranet Journal and our customers for providing a powerful and efficient intranet solution. We have invested a significant amount of time and effort in developing an easy to use, feature rich, out of the box intranet solution and this nomination proves we have got it right. Organisations using Interact report measurable improvements in the way their operations run, which leads to costs savings and efficiency gains which are of particular importance during an economic downturn."

Interact (<http://www.interact-intranet.co.uk>) has been supporting businesses with world-class intranet software for well over a decade and the latest version of the software overcomes the age old problem of out of date and unmanageable content that exists on any intranet when more and more documents are added. At its heart is an intelligence store which learns as people use it, adapts and then re-profiles content. This unique and innovative adaptive learning capability sets Interact a significant step ahead of the competition.

Notes for Editors:

About Odyssey Interactive:

Founded in 1996, Odyssey Interactive Ltd are intranet experts and one of the UK's longest established

internet companies. Based in Altrincham, Cheshire, the company specialises in providing the UK's leading intranet product, Interact.

With over a decade of intranet expertise Odyssey has build a reputation for both product excellence and outstanding customer support. Odyssey's customers report tangible benefits resulting in considerable cost savings and rapid return on investment. Interact is used by over 100,000 people across all sectors - clients include HMV, Waterstone's, Chelsea Football Club, Tyco ADT, Tradeteam DHL, Amicus, CLIC Sargent, Calor as well as NHS and social housing organisations.

About Interact:

Interact is a versatile, fully secure Intranet which can be quickly and easily updated by non technical users allowing companies to have a single source portal for information such as staff details, news and procedures. The flexibility of Interact enables companies to start with a basic set of core modules, then add additional modules to suit their business processes, using a phased approach.

The latest version of the software, Interact 4.0, is a revolution in intranet technology that has been developed to take advantage of the latest technologies as used by websites like Facebook, MySpace and Amazon. Its unique, adaptive learning capabilities means it can deliver personalised results that set it a significant step ahead of other out-of-the-box solutions. It will improve efficiency by giving staff information that is relevant.
