

Elite's Software Offers a Recipe for Success for Process Manufacturers

Submitted by: Elite Business Services

Thursday, 19 February 2009

Midlands based business software specialists Elite Business Services (<http://www.elitebusinessservices.co.uk>) have launched version 3 of their FormulationPro (<http://www.elitebusinessservices.co.uk/FormulationPro.html>) solution.

Aimed specifically at companies who use recipes in production FormulationPro (<http://www.elitebusinessservices.co.uk/FormulationPro.html>) offers process manufacturing companies an award-winning, integrated solution with functionality from core accounts to production.

Elite's Managing Director, Tahir Iqbal explains, 'we found many companies were struggling with disparate systems, excel spreadsheets and old technology. The integrated solutions available to them either didn't take into account the way their industry worked or were extremely expensive.'

The latest company to invest in FormulationPro (<http://www.elitebusinessservices.co.uk/FormulationPro.html>) is Birmingham based specialist coatings manufacturer Indestructible Paint (<http://www.indestructible.co.uk/>). Finance Director John Toon adds, 'we're looking forward to implementing a solution that streamlines and integrates accounts and production, removing complexity and improving operational efficiency.'

END
