…Eurodata Systems (http://www.eurodatasystems.com) scoops Nimsoft dashboard design award…

London, UK. – 10th March, 2009 – Nimsoft, Inc., the "Big 4" alternative for IT performance and availability monitoring solutions, today announced that Eurodata Systems, a UK-based Managed Service Provider, has won the inaugural Nimsoft EMEA dashboard award. The award recognizes best-practice in dashboard design and innovation and follows hard on the heels of Eurodata's success in being only one of six UK firms to feature in the prestigious MSPmentor 100 survey (http://www.eurodatasystems.com/News/NewsArticle.asp?ID=33).

Eurodata's dashboards were submitted at an open contest at Nimsoft's recent EMEA user conference, n-fluence. The standard of submissions was incredibly high and reflected the extent to which Nimsoft's dashboard technology enables companies to easily and rapidly tailor and expand on the basic design. Eurodata's dashboard submissions stood out for their ability to present a wealth of information in a concise and eye-catching manner.

"Eurodata's success is in part due to their investment in technology solutions that enable them to deliver a consistently high level of customer service. Intuitive dashboards form a key part of an MSP's toolkit and are instrumental in managing the performance and availability of complex IT infrastructures. Eurodata has drawn on Nimsoft's dashboard platform to create customized designs that meet their customers' requirements. It comes as no surprise that Eurodata has scooped the dashboard award and secured a place in the MSPmentor listings," said Tim Bisley, VP EMEA.

"This has been an exceptional past couple of months for us. Being awarded the Nimsoft dashboard award is a testament to Eurodata's innovative forward-thinking approach and that we always have our customer's business requirements in mind. Our confidence with Nimsoft dashboards has certainly helped in Eurodata's growth in success and continued demand with our monthly managed services briefings," said Des Lekerman, co-founder and managing director at Eurodata Systems.

About Eurodata Systems
