Attendees of Virtualization 2008 Partner IT-Business Academy Conference vote Guth as most engaging presenter

Buffalo Grove, IL, March 16th, 2009 — Vizioncore Inc., the market leader in server virtualization management solutions to help safeguard and optimize virtualized environments, today announced that Joachim Guth, Director of DACH for Vizioncore, was voted as the most engaging speaker from the attending Classic Partners at the recently held Virtualization IT-Business Academy Conferences, hosted by German publishing house, Vogel IT-Medien GmbH.

At the end of the event, attendees were asked to assess each and every lecture they attended and grade the speaker on content/value of the talk and on presentation skills. Guth received "A" grades for both, making him the most successful speaker of the conference. He presented on "Mission Virtualization – has started but what now?", which covered how to move from the physical world to the virtual world and once there, how to manage this new infrastructure.

"Our conferences are all about engaging with the attendees, both partners and IT decision makers and presenters like Joachim really add enormous value to what we hope are educational and interesting tracks," said Daniela Schilling, Executive Manager IT-BUSINESS Akademie at Vogel IT-Medien. "We're delighted that our end-of-conference evaluation surveys help to highlight the very best presenters and we look forward to inviting Joachim back for our 2009 event!"

About Vizioncore Inc.

Founded in 2002 and headquartered in Buffalo Grove, IL, Vizioncore Inc. is a fully owned subsidiary of Quest Software. The company has operations in North America, EMEA, Asia and Australia. Vizioncore's products provide server virtualization management solutions that help customers safeguard and optimize their IT systems while allowing them to extract the maximum return on their investment in virtualization. Vizioncore's products are built from the ground up to support virtual environments with none of the legacy encumbrances of products built for physical servers. Over 15,000 organizations around the world, from SMBs to large-scale enterprises, use Vizioncore's products. Vizioncore operates independently and distributes its products through an extended partner network of over 2,200 value-added resellers worldwide.
