TADASoft beats larger rivals to win "Storage Product of the year" Livingston, UK. 16th March 2009.

TADASoft, an award winning vendor of innovative configuration backup appliances has been awarded Storage Product of the year by the readers of Storage Biz-News.com . Beating established vendors including Dell, Fujitsu, Compellent, and Asankya, the Restorepoint appliance has in a short space of time become the most innovative product in its class.

Restorepoint is a multi- award winning integrated hardware and software solution for Network Administrators, which makes it easy to automatically backup and store the configuration of their network devices and to restore it when needed. This is managed from one convenient central location with an easy to use web interface. Restorepoint is the only vendor independent appliance on the market and the first product to address this commonly overlooked issue.

Commenting on the news that Restorepoint won 45% of the vote, Rory Nolan, Director of TADASoft said:

"We are absolutely delighted to be recognised by Storage Biz-news for our product. We are a new vendor to the market but have already seen great success in an area that is traditionally not served by the more established storage solutions. "

During the voting process, Restorepoint got some strong endorsements from the readers.

One voter described Restorepoint as "unique", stressing the appliance-based solution's ability to automatically backup configs from multi-vendor devices.

"It will also alert the admin if any change has been made to the config and detail this change," said the storage-biz.news reader.

"The admin can then on the fly roll back the config by restoring the master copy template or one of the other back ups from a previous hour/day/week/month."

Another factor that garnered support was the fact Restorepoint supports numerous devices, including Cisco, Check Point, Juniper Networks, Blue Coat, Barracuda Networks, Proofpoint and HP Procurve.

While cost and ease of use were highlighted, one voter pointed to Restorepoint's ability to increase network management productivity.

"It can also help towards gaining or maintaining the complex PCI DSS compliance standard," said the voter.

About TADASoft

TADASoft is a privately held company with headquarters in the UK. The company's mission is to provide

powerful enterprise-class appliance solutions that are suitable for the largest of organisations, yet offer the ease of use and affordability for small business applications. Restorepoint won “Most Innovative Storage Product” at the recent Storage Expo and won “Storage Product of the year” by Storage Biz News. Restorepoint is also a finalist in the SC Awards Europe 2009 in April. To find out more about Restorepoint visit www.tadasoft.com
