

ANOTHER VINTAGE DESIGN FROM MHS RADIATORS

Submitted by: Red Cell

Tuesday, 24 March 2009

MHS Radiators has launched Vintage - a stunning modern take on a classic period radiator.

Vintage is a sublime combination of two radically different types of materials creating a smart, stylish and very sexy design. Transparent acrylic end panels sandwich a wonderfully shiny chrome steel radiator – creating a completely new look. So whether you're crafting a shabby chic loft apartment or creating an über fashionable modern interior, Vintage seamlessly blends the traditional with the contemporary.

Vintage is available in two sizes – six sections or eight sections. The six section model measures 810mm (h) x 360mm (w) x 200mm (d) and has an output of 585 Watts. The eight section model measures 810mm (h) x 480mm (w) x 200mm (d) and has a 780 Watt output.

Vintage is part of MHS Radiators' popular and wide ranging collection of ultramodern, modern and traditional radiators and towel rails and is available through the extensive UK network of MHS Radiator Display Centres – for details visit www.mhsradiators.com

A full selection of high resolution images from MHS Radiators is available at www.pressloft.com.
