Suzy Greaves, ex-health editor of *New Woman* and *OK! Magazine*, now Life Coach, knew it was time to change

her life when she woke up at 1.20am on New Year's Day 12 years ago with a crushing hangover, 30 miles from home having slept through her stop – knee-deep in debt and constantly exhausted from working 16 hour days. www.thebig-leap.com

Georgia Foster knew it was time to tackle her yo-yo dieting and binge eating/drinking when it became out of control. Training to become a clinical hypnotherapist and expert on Voice Dialogue Theory led to her understanding the role of the inner critic and she lost 3 stone. Georgia is now an internationally respected author of 3 best-selling books dealing emotional issues relating to weight, drinking & intimacy/sex. www.georgiafoster.com

Viv Alves learnt 12 years ago that it was definitely time to change her life when she was signed off sick from work with anxiety and stress. She retrained to become a yoga coach and is founder of Warrior at Work, a yoga company that promises to increase your emotional and physical strength. www.warrioratwork.co.uk

Dr David Hamilton, was a scientist in the pharmaceutical industry when he became fascinated by the placebo effect and started to explore the power of visualisation, belief and positive thinking and their effects on the body. He now travels the world, offering workshops to help understand the power of the mind on the body. www.drdauidhamilton.com

John C Parkin, packed up his life in London with his wife and twin boys in a camper van and decided to set up the retreat The Hill That Breathes in Italy, and has created the F**k It philosophy, best-selling book and brand. www.thef-itway.com & www.thehillthatbreathes.com
