---

The UK's only online price checking site for the Alli Weight loss Aid (<http://www.alli-diet-pills.co.uk>) can today reveal that despite only launching in the UK a few days ago it has been the fastest selling product so far in 2009.

A website that checks the price of Alli Weight Loss Aid across reputable online chemist and pharmacy e-retailers today reveals that Alli has been the fastest selling UK new product launch of 2009.

[www.Alli-diet-pills.co.uk](http://www.Alli-diet-pills.co.uk) (<http://www.alli-diet-pills.co.uk>) launched only 3 days ago and has already generated thousands of sales across the UK.

At peak sales times during Tuesday 21st April 2009 two Alli Weight Loss Aid products were selling every minute between the hours of 2pm in the afternoon and 6pm in the evening.

[www.Alli-diet-pills.co.uk](http://www.Alli-diet-pills.co.uk) (<http://www.alli-diet-pills.co.uk>) only compares prices of reputable online chemists and pharmacist e-tailers such as Boots, Chemist-Direct.co.uk and ExpressChemist.co.uk who check potential buyers body mass index before permitting any sales.

Speaking about the high volume of sales of Alli Weight Loss Aid products, Peter Williams from Alli-Diet-Pills.co.uk said,

"There is no doubt that the Allie Weight Loss Aid (<http://www.alli-diet-pills.co.uk>) is THE fastest selling health and diet related product of 2009. We will continue working with only the most reputable online chemists and pharmacists to ensure that it is only sold to those who are fully aware of how the product works and meet the necessary Body Mass Index criteria".
