

Tata Technologies to showcase PLM expertise at Paris Air Show

Submitted by: The Crocodile Design & Marketing Ltd

Wednesday, 29 April 2009

As a world leader in PLM and design engineering solutions for the aerospace industry Tata Technologies provides products and services to all of the top ten aerospace OEMs.

Tata Technologies (<http://www.tatatechnologies.com/global/aerospace.aspx?MenuCode=157>), a global leader in Engineering Services Outsourcing (ESO), Product Development IT services, and Product Lifecycle Management (PLM) will be exhibiting at the International Paris Air Show (Stand C1 in Hall 6) in Le Bourget from 15 to 21 June 2009. Tata Technologies will use the event to showcase its full range of PLM services.

Tata Technologies (<http://www.tatatechnologies.com/global/aerospace.aspx?MenuCode=157>) offers PLM solutions from leading software vendors including Dassault Systèmes and MSC Software. As well as supplying industry leading PLM software, Tata Technologies experts have been providing strategic and technical consulting since 1997, spearheading PLM process reengineering and improvement initiatives at the world's leading aircraft manufacturers. With an integrated workforce of 4,000 in 14 countries, plus near-shore and offshore centres around the world, Tata Technologies can provide the joined-up engineering solutions required to deliver improved efficiency and reduced costs.

Lawrence James, VP Global Sales, Tata Technologies comments: "Increasingly aircraft manufacturers are looking to boost product innovation and reduce costs and development times. Tata Technologies is dedicated to providing leading edge PLM solutions and services to the aerospace marketplace. We work with customers to ensure every stage of the product lifecycle is optimised to maintain premium quality. Our global presence means we can guarantee worldwide delivery with minimum lead times. The International Paris Air Show is the world's premier aerospace event and we are looking forward to discussing our aerospace capabilities with a focused global audience."

As well as PLM, Tata Technologies also provides complete design-to-build aerospace solutions to many of the world's foremost aerospace manufacturers. Tata-HAL, the company's partnership with Hindustan Aeronautics Limited (HAL), Asia's premier aerospace manufacturer, has boosted Tata Technologies' engineering services resource and means it can offer clients tremendous cost and time savings and world-class design-through-build solutions.

Ends.

About Tata Technologies

Tata Technologies Limited (<http://www.tatatechnologies.com/global/>), founded in 1989 and a part of the Tata group, is a global leader in Engineering Services Outsourcing (ESO) and Product Development IT services to the global manufacturing industry. Tata Technologies, through its pragmatic approach to engineering and manufacturing processes, delivers best-in-class solutions for Product Lifecycle Management (PLM) and Enterprise Resource Management (ERM) to the world's leading automotive and aerospace manufacturers and their suppliers.

Tata Technologies is headquartered in Singapore, with regional headquarters offices in the United States (Novi, Michigan), India (Pune) and the UK (Luton). The company has a combined global work force of more than 4,000 professionals serving clients worldwide from facilities in North America, Europe and the Asia-Pacific region. www.tatatechnologies.com
