

# Bringing award winning backup technology to the Israeli market

Submitted by: SO Marketing

Thursday, 7 May 2009

---

TADASoft, an award winning vendor of innovative configuration backup appliances has appointed iSecure to distribute their Restorepoint solution in Israel.

TADASoft, who have just won the SC Magazine Europe Innovation award 2009, and iSecure, a leading value added distributor of security products have today announced a new partnership that will bring the Restorepoint range of configuration backup solutions into the iSecure portfolio. With a portfolio of more than 550 resellers, iSecure brings to TADASoft the experience of launching emerging security products into the Israeli market.

Restorepoint is the only award winning integrated hardware and software solution for Network Administrators, which makes it easy to automatically backup and store the configuration of their network devices and to restore it when needed. This is managed from one convenient central location with an easy to use web interface. Restorepoint is the only vendor independent appliance on the market and the first product to address this commonly overlooked issue.

"This partnership with iSecure brings our unique technology into this fast growing market. With data backup being a legal requirement in Israel, Restorepoint gives our end user customers a solution that allows them to backup multi-vendor device configurations that nothing else on the market currently offers", said Rory Nolan, Director of TADASoft.

Eyal Achiel, Director of iSecure said "Restorepoint is a fantastic product for us, because after only showing the box to our resellers with a brief explanation, we already have a waiting list of pilots to be done. This is the product the channel was waiting for..."

## About iSecure

iSecure Ltd. is a leading Distributor that specializes in best-of-breed IT Security and Datacom solutions.

iSecure's mission is to sell best of breed technology only through its partners, who are skilled System Integrators and resellers. iSecure management has a long experience in the Israeli integration & distribution market.

## About TADASoft

TADASoft is a privately held company with headquarters in the UK. The company's mission is to provide powerful enterprise-class appliance solutions that are suitable for the largest of organisations, yet offer the ease of use and affordability for small business applications. Restorepoint won "Most Innovative Storage Product" at the recent Storage Expo, " and the prestigious Innovation award by SC Magazine.
