---

New survey proves the efficacy of Profol Scalp Clear Treatment Shampoo.

Profol Scalp Clear Treatment Shampoo has been given the thumbs up by those who tested it in a recent survey.

The Julian Jay Hair and Scalp Clinic – the UK distributors of their own formula Profol treatments - recruited people via the internet. These people were asked a set of questions before they used Profol and another set of questions following daily use of the specialist shampoo for one month.

Participants were initially asked:

- o how long they had been suffering from itchy scalp,
- o to rate their itchy scalp condition
- o if they had tried other products to resolve the condition and if they had worked

Following the use of Profol for a period of one month they were asked to rate the improvement in their own scalp condition on a scale of 1 - 5

The results showed an average score of 3.05 (out of a total of 5) for improvement

Next, they were asked if their scalp felt more comfortable since using Profol Scalp Clear Treatment Shampoo

65% of respondents said a resounding yes

Finally Profol asked if they would recommend Profol Scalp Clear Treatment Shampoo to their friends

And an overwhelming majority of 73% of respondents said yes

These results came as no surprise to the people at Profol who receive hundreds of positive responses from their customers each week.

“The survey results are backed up by the phenomenal success we see from our clients as they report back when re-ordering Profol Scalp Clear Treatment Shampoo.” said Julian Jay, MD of the Julian Jay Hair and Scalp Clinic. “The vast majority of our customers are very enthusiastic about our products. Very often they have come to us as a last resort having tried any number of treatments from their pharmacy, GP or hairdresser. Often they are sceptical initially but committed to trying to find a solution to their problem. When they find that Profol Scalp Clear Treatment Shampoo works for them they are both amazed and thrilled!”

Profol Scalp Clear Treatment Shampoo provides the most effective relief for dandruff, psoriasis, eczema,

dry, itchy, sore and flaky scalp conditions. It is unlike any other daily use shampoo in that the careful formulation ensures that it won't strip away essential oils or damage delicate new skin.
