Dremel is launching a new Hobby range for crafts enthusiasts.

Easy and light to use, there are six innovative products: an engraver, a glue gun (with glitter sticks), a multi-tool, a project table and a butane torch, as well as the original Dremel 300 Series multi-tool.

The Dremel Hobby range can be used for all manner of arts, crafts, hobbies and modelwork - indeed, its applications are limited only by the imagination of the user! Jewellery and card making is made easy; so is etching into plastic, metal and wood. Gift and seasonal decorations can be created in minutes instead of hours.

The dual-temperature Dremel Glue Gun claims more features than any other currently on the market. It has a large, secure foot and kick stand for extra stability that can be operated with one hand. The Glue Gun together with the new Glittersticks can be used for all sorts of gluing and decorative projects, such as scrap-booking, flower arranging, plus decorations on glass, wood and much more. The kit includes 12 regular Dremel Glue Sticks and 12 colour Glittersticks which can be purchased separately, if required. SSP for the Glue Gun is £28.99 and £4.49 for the Glittersticks.

The Engraver is perfect for the creative hobbyist who wants a reliable tool to meet all their fine detailing needs. The Dremel Engraver's soft grip body and light, compact design provide comfortable use for precision engraving on all materials. Use the carbide tip for unhardened glass, soft plastics, leather and wood. Or switch to the diamond tip for engraving and decorating ceramics, hard plastics, metal and hardened glass. The kit also comes with creative templates to help you devise imaginative decorations. SSP £29.99

The Versatip is also an essential piece of kit for creative hobbyists. It is a gas butane torch with six interchangeable tips that make it suitable for a wide variety of applications. Think embossing, soldering, melting, hot cutting, welding, shrinking and even wood-burning (pyrography) - allowing for even the most detailed and intricate tasks to be carried out with ease. Powered by liquid butane gas, the Dremel Versatip is quick to heat up and fast to recharge - within 10 seconds - ensuring that it's always ready to use. SSP £33.99

The Stylus is a multitool that has maximum manoeuvrability. It is cordless, small and extremely lightweight with a focus on precision. This makes it the ideal tool for a wide range of creative projects like jewellery making, woodworking, engraving and all sorts of other crafts. It comes with a kit of 25 complementary high quality Dremel accessories and includes storage compartments for your projects' accessories. It is powered by 7.2V lithium-ion technology. SSP £59.99

The Project Table is one of the smallest work tables on the market. Designed specifically for people working on detailed projects, it is compact, lightweight and high quality. Unlike standard project tables that are large and heavy, it can be used both indoors and out by the keen hobbyist and small-scale DIYer! SSP £26.99

With a unique design to improve ergonomics and increase comfort, the Dremel 300 Series multitool will prove its worth in carrying out any number of projects especially those that require precision and speed, such as woodworking. The powerful 125W motor optimises performance and its soft grip has been designed to reduce vibration and better handling of the tool. With 25 accessories (including a high speed cutter) to choose from and some added templates, the Dremel 300 Series caters for every creative project that requires carving, sanding, polishing, cutting and other tasks. SSP £44.99

Stockists for Dremel Hobby products will include Argos and Homebase.
