

Mobile Fun Launch The iPhone 3G S Power Case To Boost Battery Life!

Submitted by: Mobile Fun Ltd

Tuesday, 21 July 2009

Mobile Fun (<http://www.mobilefun.co.uk>), the online retailer of Mobile Accessories announces the launch of the iPhone 3G S Power Case to extend the battery life of the power hungry iPhone 3G S.

When the fastest, most powerful iPhone was released problems with battery life were always going to happen. The sealed unit does not allow a spare battery to come to the rescue, therefore innovative solutions have had to be developed.

The iPhone 3G S Power case (<http://www.mobilefun.co.uk/iphone-3g-s-3g-charging-leather-case-p18580.htm>) is one such solution. It contains a rechargeable battery within the case so that it can be used as a charger or if insitu the iPhone will use the power within the case to extend its battery life.

Jazz Singh, Product Manager for Mobile Fun states,

“Poor battery life will always limit the iPhone’s usability when users are out and about, therefore extended battery life solutions are the way forward and this case does a great job.”

“The other great thing about this case is that it is made of leather so it looks fantastic, plus it is slim line, users wouldn’t even know the case contained a battery.”

Mobile Fun has a range of iPhone 3G S cases (<http://www.mobilefun.co.uk/cat/iPhone-3G-S-Cases.htm>) to protect, accessorise and even charge the iPhone 3G S.
