Monday, 27 July 2009

The world's most highly trusted range of content filtering software for Mac and PC is now available from download software superstore www.downloadbuyer.com

BUCKINGHAMSHIRE, England – Net Nanny from ContentWatch (<http://www.downloadbuyer.com/ContentWatch/29/d>), Inc. is the most successful and trusted parental control software in the world. Available for PC and Apple Mac Net Nanny can be installed quickly and easily to provide parents control of what can and cannot be accessible on a computer.

Net Nanny 2 (http://www.downloadbuyer.com/ContentWatch_-_Net_Nanny_2_For_Mac/56/1/29/v) for Mac provides parents a host of features allowing total control over their child's computer. Features include;

Remote management to allow configuration when away from the computer.
Instant Messaging alerts inform parents by email of potential predatory behaviour and or other inappropriate contacts and comments made through popular IM programs.

Customisable "allowed" or "Blocked" lists to restrict access to unacceptable sites.
Detailed log files to track use and access.
Scheduled Internet Access to allow access at specified times only.
Game and application blocking to provide more control over what can and what cannot be used.

Net Nanny is the popular choice for parents wanting to protect their children from unwanted and potentially offensive Internet content but it doesn't stop there. Net Nanny is perfect for schools and educational authorities wanting to restrict access in the classroom to ensure children can't access offensive websites while learning and thereby interrupting a whole classroom.

[Downloadbuyer.com](http://www.downloadbuyer.com) (<http://www.downloadbuyer.com>) is a new software shopping site offering popular, high quality software titles in downloadable format for incredible convenience and reliability.

Net Nanny 2 (http://www.downloadbuyer.com/ContentWatch_-_Net_Nanny_2_For_Mac/56/1/29/v) for the Mac along with Net Nanny 6 (http://www.downloadbuyer.com/ContentWatch_-_Net_Nanny_6/54/1/29/v) for PC and the full range of business content filtering applications ContentProtect from ContentWatch are now available and could be installed on your computer in just a few minutes from reading this.

Downloaded software arrives quickly, can be used straightway and is often cheaper than boxed counterparts. Products are also always in stock!

For a huge catalogue of titles for both Mac and PC www.downloadbuyer.com (<http://www.downloadbuyer.com>) is the shopper's choice.

About [Downloadbuyer.com](http://www.downloadbuyer.com)

Founded by former publisher Jon Silvera in 2008, Downloadbuyer.com Ltd is an online destination store for downloadable software. Based in the UK Downloadbuyer presents hundreds of software titles from well known and established developers and publishers to consumers and small to medium businesses alike. The Downloadbuyer platform is one hundred percent owned by Downloadbuyer.com Ltd and is under continual development. It is available for white labeling, can be customised and tailored to suit any sales environment and is available as a simple technology addition to an existing site or as a complete ecommerce platform with an already configured catalogue of products.
