

COA Solutions is Business Software Satisfaction Awards Finalist for Second Year Running

Submitted by: Advanced Computer Software Group Limited

Thursday, 30 July 2009

COA Solutions (www.coasolutions.com) has made the final of the Business Software (<http://www.coasolutions.com>) Satisfaction Awards 2009 for the second consecutive year. COA Solutions' financial management is one of four products that has made the Enterprise Accounting Software (<http://www.coasolutions.com>) category shortlist with the winner being announced at an awards ceremony on 8 October 2009 at The Royal Courts of Justice, London. COA Solutions' document management (<http://www.versionone.co.uk>) subsidiary, Version One, is also a finalist in the Paperless Office (<http://www.versionone.co.uk>) category of the awards. Version One has reached the final the past three years, winning the accolade in 2007.

The Business Software Satisfaction Awards (www.softwaresatisfaction.co.uk) recognise high standards from software application providers serving UK businesses and are based on the views of genuine end-users. More than 8,100 software users voted in the Business Software Satisfaction Awards 2009, an increase of over 2,000 users compared with 2008, making the survey one of the largest individual pieces of business software research in the UK.

Mark Thompson, Managing Director of COA Solutions, says, "We continue to work very closely with our customers and are doing our utmost to support them through these challenging economic times. It is therefore very satisfying that once again, feedback from end-users has resulted in us being shortlisted for these prestigious awards which serve as a valuable indicator of customer satisfaction levels within the UK software industry."

Thompson adds, "We are investing heavily in further developing our Smart Business Suite of business systems, including our financial management solutions. We look forward to rolling-out these enhancements to our customer base over the next twelve months, consolidating our position as the leading provider of business software systems to the UK mid-market services sector."
