TADASoft expands further into Norway

Livingston, UK. 15th September 2009.

TADASoft, who are a world leading, award winning vendor of multi-vendor network device configuration backup technology, and Trygg Data, a leading specialist distributor of IT security products in Norway have today announced a new partnership that will bring the Restorepoint range of configuration backup solutions into the Trygg Data portfolio. With a portfolio of more than 10 vendors and 500 resellers, Trygg Data brings to TADASoft the experience of launching emerging security products into the Nordic market.

Restorepoint is the only award winning integrated hardware and software solution for Network Administrators, which makes it easy to automatically backup and store the configuration of their network devices and to restore it when needed. This is managed from one convenient central location with an easy to use web interface. Restorepoint is the only vendor independent appliance on the market and the first product to address this commonly overlooked issue.

Egil Løseth, MD of Trygg Data said "The reason we have introduced TADASoft to Norway is that we are seeing a great need for this kind of solution in the market" he added, "Until now there have been no good solutions to manage the backup and restoration of network device configuration files and we see it as a good opportunity for our resellers to grow that side of their businesses. Restorepoint is simply a brilliant and easy to use solution".

## About TADASoft

TADASoft is a privately held company with headquarters in the UK. The company's mission is to provide powerful enterprise-class appliance solutions that are suitable for the largest of organisations, yet offer the ease of use and affordability for small business applications. Restorepoint won "Most Innovative Storage Product" at Storage Expo, the prestigious Innovation award by SC Magazine and named as one of the Worldwide Emerging Storage Vendors by ChannelWeb. Restorepoint is sold through a channel of worldwide distributors and VAR's. More information about TADASoft can be found at [www.tadasoft.com](http://www.tadasoft.com)

## About Trygg Data

Established in 1992, Trygg Data distributes many security products in Norway including BioCryptodisk, SecurEnvoy, CRYPTOcard, Fortinet, SecuPlus, Nillex, Allot, Yoggie, SendQuick and Radware. Our customers include Norway's leading companies both private and governmental and we have 500 resellers across the country.
