Cezanne Software Announces FREE Webinar - Practical Tips for HR - How to achieve a successful roll-out of global HR software

Submitted by: Talentia Software UK Limited

Thursday, 5 November 2009

With over 20 years' experience in rolling out international HR systems to many of the world's leading organizations, Cezanne Software today announced that they will be presenting an online webinar on "How to achieve a successful roll-out of global HR software solutions (http://www.cezannesw.com/solutions/) on Thursday, 26th November 2009 at 2:30pm GMT.

Cezanne Software will share their best practice approach and discuss with you a number of key client global HR software implementations so that you can identify the steps that you need to take to ensure the success of your own international HR system (http://www.cezannesw.com/services/professional-services.aspx) projects. Cezanne Software will also provide companies with practical tips on how to take advantage of global systems, address key strategic HR issues, and be in a stronger position to leverage resources and streamline operations across geographies.

Julie Windsor, Director of Operations for Cezanne UK & Benelux, comments, "In the past, all but the largest of international organizations have had to make do with managing their global workforce using disconnected and disparate HR systems (http://www.cezannesw.com/solutions/people/). In the old economy this worked – just about. In today's more competitive and rapidly moving environment, this approach is no longer sustainable, or necessary."

As a result, organizations are seeking global human resource software (http://www.cezannesw.com/solutions/people/) solutions that deliver HR cost efficiencies, as well as higher levels of employee engagement, retention, and productivity. Such a solution is the perfect tool to help organizations sharpen their competitive edge in the global business landscape.
