Storage is always the greatest challenge in any kitchen. For those looking to use every available space but without the expense of a bespoke kitchen Neptune have the ideal solution. The Chichester Grand Larder is a prime example of Neptune's philosophy to design furniture that combines form and function whilst using only the finest materials and true craftsmanship. The Chichester Grand Larder is in every sense a magnificent piece of furniture.

Neptune has cleverly designed full height cabinets with the purpose of allowing a selection of cabinets to be teamed up collectively to produce a fabulous centrepiece to any kitchen whilst concealing a vast capacity of storage. A wide variety of options is therefore possible to suit all size kitchens and again provide a bespoke/tailored feel to each customer's specific needs.

Just one example of a combination (shown in the images here) is two larder cabinets combined with a bridge link cabinet above an American style fridge/freezer– this storage unit is indeed a grand design!

The smaller kitchen can use the two larders without any bridging cabinets to create a compact yet fully featured, free standing larder space, concealed fridge freezer, or equally an oven housing cabinet; in fact there are endless combinations.

Available in as many colours as are their kitchens these full height cabinets lend an elegant and sophisticated feel to any kitchen. As usual with Neptune, only the best materials and the most advanced manufacturing techniques are used and the value for money is simply amazing – The Grand Full Height combination shown including the bridge is from just £3350 (excluding appliances). Incredible storage, incredible craftsmanship and an incredible price!

The Chichester collection also includes a wide variety of beautifully crafted freestanding furniture including, glazed dressers, glazed cabinets and wine racks as well as a vast choice of kitchen cabinets and islands.
