How to Normalize SCCM data, Highlight Suites & Bundles

Operational data from SCCM rules your day-to-day activities. With it, SCCM administrators keep the lights on, secure the devices, and provide the business with tools for success.

However, to elevate the role of SCCM, the data must be transformed into meaningful information that can be digested, analyzed, and acted upon by the business in their own language. In this webcast, you will learn how to:

- Convert raw SCCM data into actionable information for business analysis
- Assemble suite and bundle information for a true picture of your software deployments
- Hear directly from an IT executive at one of the largest US financial firms on how they transformed their operational data into actionable information

Learn how to empower your SCCM to deliver better information for both your operational and strategic needs.

Date/Time:

Tuesday, Feb. 22, 2011

10:00-10:30 am Pacific

18:00-18:30 pm GMT

Speakers:

Walker White, CTO, BDNA & BDNA Customer, VP/Dir Infrastructure Technology, one of the largest US financial firms

This webcast is Part 2 in a 3-Part Techcast Series: Unlock the Strategic Value Hidden in your SCCM Data.
