---

The use of Teak furniture continues to signify the quintessential English garden. One of Neptune's top selling items year after year continues to be their beautiful Teak collection. Teak simply improves with age not only providing a timeless elegance to any garden setting but given its natural high oleoresin content ensures that it naturally stands the test of time. A variety of styled chairs all designed with maximum comfort in mind, and wide variety sized tables to cater for small intimate al fresco dining, large party gatherings or just a peaceful twosome with the stunning Hampton Steamers (pictured below), Neptune offers an enviable choice. For those looking to create a coordinated look or mix and match, simply chose from the many other ranges available to create a bespoke look that is perfect for you.

Over the last 14 years Neptune has become a leading authority in innovative design. Lovingly crafted, using age old techniques, each piece is made with longevity in mind, for future generations to also enjoy.
