New GD3070 Rugged Tablet Computer by General Dynamics Itronix Fills the Gap between Rugged Computers and Personal Digital Assistants

The GD3070 delivers cost-effective computing performance and extended battery-life in an ergonomically designed tablet PC, built to withstand the demands of a mobile workforce

Tuesday April 5th 2011, Coventry, United Kingdom – General Dynamics Itronix announces the introduction and immediate availability of the rugged, ergonomically designed GD3070 Tablet PC. Larger than a personal digital assistant (PDA) and smaller than a fully-rugged notebook, the GD3070 delivers business-critical computing performance with a daylight-viewable screen and extended battery life for mobile workers throughout Europe and the Middle East. With sales, service and technical support located in Europe, the GD3070 is a cost-effective computing option for mobile workers within public utilities, surveying companies, field service representatives and others.

The GD3070 comprises an 18-centimeter, high-resolution touch-screen display enabling users to easily pinpoint information on maps or view imagery in bright sunlight. Equipped with an Intel® Z530P low-power processor, 120 gigabit hard-drive, large memory and lightweight dual battery pack, mobile workers can manage large data files as well as process complex computing operations quickly and efficiently for up to 10 hours.

GD3070 features:

- Rugged magnesium chassis and impact absorbing polycarbonate casing
- Ergonomic design for single-handed operation
- Operating temperature from -20C to +60C
- FCC, CE, EMI/Safety CSA
- Meets United States MIL-STD-810G for:
 - Humidity
 - Altitude
 - Shock
 - Drop
 - Vibration

Specifications overview:

- Intel Z530P Atom processor
- One 200 pin DDRII Socket
- 18 cm LCD display with touch-screen panel
- Full backlit keyboard
- Barcode scanner
- Integrated 2.0 Mega Pixel camera
- Global positioning system

- Bluetooth, WiFi and integrated Ethernet connectivity
- 225 x 145 x 39.8 mm dimensions
- 1.2 kg weight depending upon configuration

For additional information or to locate a sales agent for the General Dynamics Itronix GD3070, go to www.gditronix.eu. The unit has a limited three-year warranty and will have an MSRP from £1,558

A part of General Dynamics C4 Systems, General Dynamics Itronix is a leading developer of wireless, rugged computing solutions for mobile workers, offering a full range of field computing systems including laptops, ultra-mobile notebook PCs and tablet PCs.

General Dynamics C4 Systems is a business unit of General Dynamics (NYSE: GD). More information is available at www.gdc4s.com.
