

Bio-Synergy launch new Skinny Water Orange!

Submitted by: Bio Synergy

Tuesday, 5 April 2011

Bio-Synergy (<http://www.bio-synergy.co.uk>) is excited to announce the launch of the brand new Skinny Water Orange (<http://www.bio-synergy.co.uk>). The healthiest flavoured water on the market!

This fabulous new variant of the original celebrity endorsed Skinny Water is set to hit shelves this April 2011! This new zero sugar drink is enhanced with a unique combination of ingredients to help you maximise weight loss. Together with the hydrating effects of water, naturally occurring amino acids and nutrients will help suppress your appetite and increase metabolism to burn more fat.

So what's the secret behind Bio-Synergy Skinny Water? It's the added benefits of Chromium and L-Carnitine. These nutrients have been scientifically proven to banish sugar cravings and help turn fat into energy.

Studies show Chromium can stave off cravings for high carbohydrate or sugary foods by regulating blood sugar levels. As such, it's a valuable addition to a well-designed, long-term weight loss program and supports a healthier metabolism.

L-Carnitine is an amino acid which the body uses to turn fat into energy. It can help weight management by encouraging the body to lose fat - not muscle.

Skinny Water Orange has the extra added benefit of vitamin C, which is a brilliant anti-oxidant that helps to boost the immune system.

Each delicious drink is an excellent complement to any meal as well as before, during and after a workout. This easy to hold 500ml bottle is also perfect to store in your handbag, take along to a picnic and enjoy whenever you are thirsty or need hydration.

Each bottle is lovingly produced at our UK factory from spring water. Each 500ml bottle is less than 4k/cal and is great value money at only £1.49.

Bio-Synergy Skinny Water has also come out top in countless surveys carried out by national media – it was voted number one in a 'no diet, diet' test for News of the World's Fabulous magazine, and scored nine out of ten in a weight loss poll for the Daily Mirror. In addition, it has been voted top product by Women's Fitness and Slim at Home magazine.
