

Intuitive Business Intelligence Limited Announces Reseller Partnership with Cloud2

Submitted by: Intuitive Business Intelligence

Monday, 15 August 2011

Intuitive Business Intelligence Ltd (www.intuitivebusinessintelligence.com), the authors of advanced business intelligence solution, Intuitive Dashboards, today announced that it has signed a reseller partnership agreement with Cloud2 (www.cloud2.co.uk), a leading SharePoint and business intelligence solutions provider to the NHS and healthcare sectors. The partnership allows Cloud2 clients to benefit from the advanced capabilities of Intuitive Dashboards (<http://www.intuitivebusinessintelligence.com>), which empowers users to create a highly-interactive, graphical real-time dashboard view of management data, based upon the metrics and KPIs that matter most to the user.

Roger Stocker, Director of Intuitive Business Intelligence Ltd comments, "Healthcare professionals want solutions that give them an intuitive way to visualise and manage their organisational performance. Intuitive Dashboards delivers advanced capabilities to empower business users with real-time access to their most critical information which typically resides in numerous disparate systems."

Stocker continues, "Cloud2 is a highly innovative player in the information management and collaboration market space, so our partnership will enable us to combine our joint approaches to create more value for clients as IT departments strive to bring transparency and immediacy of business insight to their decision-making processes."

Simon Hudson, Director of Cloud2 explains, "As part of our growth strategy, we are continually looking to develop new relationships with leading technology partners. Access to and visualisation of data is key to being able to manage the complex activities of a modern healthcare trust and our clients are increasingly looking for an easy-to-use, quick-to-deploy business intelligence dashboard that gives them instant real-time visibility of their data. Quite simply, Intuitive Dashboards is vastly superior to any other dashboard solution currently available and we're delighted to be partnering with Intuitive Business Intelligence to serve the healthcare market."

In conclusion, Roger Stocker of Intuitive Business Intelligence comments, "I'm very pleased to welcome Cloud2 to our fast-growing reseller programme. Intuitive Dashboards will enable NHS Trusts and other healthcare organisations to quickly get to the root cause of potential issues and take fast action to remedy them, as well as helping them proactively identify opportunities for cost savings and performance improvement. It's a win-win relationship and we look forward to working closely with the entire team at Cloud2. In fact, we'll be supporting Cloud2 at their forthcoming seminars on 21 September at Kettering General Hospital and on 11 October at Blackpool's Teaching Hospitals. Both events include a presentation of our dashboard software and we expect attendance levels to be high."

About Intuitive Business Intelligence and Intuitive Dashboards

Intuitive Business Intelligence Limited (www.intuitivebusinessintelligence.com) is a rapidly-growing technology innovator in the field of Business Intelligence (BI) software solutions. Their products enable organisations to save time and money by making faster, more accurate decisions based on the wide-ranging data sources and systems that already exist within their business.

Their flagship product, Intuitive Dashboards, empowers users with a single, consolidated, real-time view of critical business information, combined with proactive alerts to potential shortfalls in performance against the client's most important metrics and KPIs.

About Cloud2

Cloud2 (www.cloud2.co.uk) provides Microsoft SharePoint implementations for the NHS and businesses across the UK, delivering Document and Records Management, Business Intelligence and eForms solutions that put collaboration, communication and information management at the fingertips of senior executives and managers. More information about Cloud2's seminar programme can be found at: www.cloud2.co.uk/about/contact-us/cloud2events/
