'INTENSE', 'UNIQUE', 'INDESCRIBABLE'

Sextoys.co.uk (<http://www.sextoys.co.uk>) present the REV1000 – a revolution in male pleasure

In the sex toy stakes, men have for too long drawn the short straw. While the rabbit revolutionised perceptions of female sex toys and opened the doors to whole new realms of self-pleasure, male toys have remained strictly out of the mainstream...until now.

The REV1000 (<http://www.rev1000.com>) is a ground-breaking masturbator, designed to bring male sex toys firmly into the 21st century. With 7 speeds and 7 functions, it offers an incredible 49 different pleasure combinations, all created to give a wide range of pleasure sensations. Unlike other masturbators on the market, it's sleek, discreet and incredibly easy to use – perfect for both seasoned thrill seekers, and those looking to dip their toe into the world of sex toys (<http://www.sextoys.co.uk>).

Monique Carty, Managing Director of Sextoys.co.uk (<http://www.sextoys.co.uk>), says:

"Finally we've created a sex toy that men will want to own! Our consumer trial found that while 79% of men happily use sex toys with their partners, just 21% have experimented alone. We're pretty sure this is down to a lack of 'cool' sex toys for men and this was something we wanted to remedy!

"Men love sex and they love gadgets so the REV1000 (<http://www.rev1000.com>) is quite simply, the ultimate male must have. It's perfect for first timers as it allows you to control every move – and offers such an intense and unique experience, it's also perfect for those already in-the-know."

Inside the sleek, discreet outer of the REV1000 body is a soft sleeve that caresses as it twists, spins and rotates around the shaft. The ergonomically shaped handle and easy button control unit puts the user firmly in control as the soft nodules inside the sleeve stroke and tease you into new realms of pleasure.

With an incredibly powerful Japanese motor and 49 different pleasure combinations, the REV1000 (<http://www.rev1000.com>) allows you stimulate at a variety of speeds, making the experience last as long as you like. In fact, over 70% of those who tried it said they would recommend the REV 1000 for building stamina to help them last longer during sex.

The REV1000 (<http://www.rev1000.com>) is fully rechargeable and comes with its own charger and international adaptor. It is available from Sextoys.co.uk (<http://www.sextoys.co.uk>) and costs £120.

82% of men who tried it said it was the best sex toy they'd ever used. The REV1000 (<http://www.rev1000.com>) gives an experience that is 'intense', 'unique', and simply 'indescribable' – their words, not ours!
