Designed to provide maximum mobile freedom, Mugen Power 5400mAh Lithium-Ion extended battery increases the lifetime of Samsung Galaxy Note by 2.16 times!

Mugen Power Batteries (<http://www.mugen-power-batteries.com>) (<http://www.mugen-power-batteries.com>) the manufacturer of high-capacity batteries for handheld devices, today announces the new HLI-N7000XL Mugen Power 5400mAh Extended Battery for Samsung Galaxy Note which extends the time consumers can use this popular device. The battery is immediately available from Mugen Power Batteries with free shipping worldwide.

Mugen Power 5400mAh (milliamp hour) Lithium-Ion battery extends the life of the Samsung Galaxy Note by 2.16 times delivering more power than the stock 2500mAh battery. This impressive battery performance allows consumers, especially those who are often on the move, to use the device longer. The new battery is fully compatible with the Samsung Galaxy Note and fits well into Samsung Galaxy Note.

As well as delivering longer life, the new battery is also exceptionally reliable. Like other Mugen batteries, the Mugen 5400mAh Extended Battery for Samsung Galaxy Note has undergone vigorous QA testing to ensure the highest quality and lowest return rate. The battery is also in compliance with the CE requirements.

"Samsung Galaxy Note owners are often reported to complain about short battery life of the device. We worked hard on this project and managed to fit additional 2900mAh capacity into that new battery. Our solution gives customers added battery life to stay connected longer without recharges and make more with the smartphone than ever before," says Nikolai Lebedovsky, marketing manager at eTrade Asia Ltd.

Pricing and Availability

About Mugen Power Batteries

Mugen Power is the worldwide leading brand of high performance batteries for portable electronic devices. Mugen Power means Performance and Quality and delivers a full spectrum of high quality products for PDAs, smartphones, digital cameras, camcorders, MP3 players, portable DVD players, notebooks, UMPCs and Personal Media Devices.

Mugen Power batteries have better performance (higher capacity) and reliability (longevity & safety) than other brands. The superior performance improves run time, often doubling that provided by the original brand replacement. The superior quality results in longer battery life and better protection of the powered device.

All Mugen Power batteries also undergo vigorous QA procedure, resulting in Mugen Power achieving the lowest return rate in the market. All Mugen Power batteries are CE and RoHS Certified.

NOTE FOR EDITORS: Mugen Power 5400mAh Extended Battery for Samsung Galaxy Note is available on request to editors of computer magazines and bloggers who will to write a review of the battery.
