Cupertino, Calif. USA — 31 May 2012 — ForeScout Technologies (http://www.forescout.com), Inc., a leading provider of automated security control solutions for Fortune 1000 enterprises and government organisations, has been recognised as having the Best Network Access Control solution as awarded by the Network Solutions Guide.

More than 50 judges from a broad spectrum of industry voices from around the world participated and their average scores determined the 7th Annual IT Industry's 2012 Hot Companies and Best Product Award Finalists and Winners.

This recognition was due in part to ForeScout CounterACT's superior ease-of-use, interoperability and functional breadth, as well as its flexible approach toward bring your own device (BYOD) policy, including native iOS and Android device support and mobile device management (MDM) integration options.

The ForeScout CounterACT platform provides real-time visibility to all devices connected to the network allowing the IT team to identify endpoint security gaps, such as out-of-date or inactive endpoint security software, and remediate those devices with little or no IT intervention. ForeScout Mobile, an add-on module to CounterACT, extends in-depth mobile security for Android and iOS devices to enable unified visibility and control for wired and wireless, managed and personal, and mobile and PC devices.

ForeScout was recently recognised by Frost & Sullivan as the largest independent NAC vendor, and one that is growing the fastest among leaders in the NAC market.1 The 2012 Market Analysis Report states that ForeScout's automated security control platform meets and exceeds Frost & Sullivan's NAC deployment best practices. To obtain a complimentary copy of this report, visit www.forescout.com/frost2012.

"Network Solutions Guide's recognition of ForeScout as a NAC leader is a testament to the strength of our automated security control platform and our commitment to our customers to provide best-in-class network access control," said Jack Marsal, director of solution marketing at ForeScout.

About ForeScout Technologies, Inc.

ForeScout enables organisations to accelerate productivity and connectivity by allowing users to access corporate network resources where, how and when needed without compromising security. ForeScout's automated solutions for network access control, mobile security, endpoint compliance and threat prevention empower IT agility while preempting risks and eliminating remediation costs. Because the ForeScout CounterACT platform is easy to deploy, unobtrusive, intelligent and scalable, it has been chosen by more than 1,300 of the world's most secure enterprises and military installations for global deployments spanning 37 countries. Headquartered in Cupertino, California, ForeScout delivers its solutions through its network of authorised partners worldwide. Learn more at www.forescout.com.
