Thursday, 7 June 2012

Looking for great gift ideas this Father's Day? Why not choose from the Black & Decker® range of outdoor products, ideal for a variety of gardening needs and great gifts too. From lawn mowers to hedge trimmers and blowers, these multi-functional outdoor power tools will ensure the gardening is finished to the highest standard, leaving your dad to enjoy his free time relaxing in the garden.

Black & Decker® Edge-Max Mower

Powered by E-Drive technology, the new Black & Decker® Edge-Max Mowers allow you to cut through a range of different grass types including overgrown and damp grass. The unique Compact & Go indirect cutting system saves time by slicing faster than most mowers and holds up to 33% more grass, so emptying is required less often. When the mower is full you simply pull the rear lever to compact the debris before emptying.

Designed to safely ensure there is no open access to the blade, the Edge Max mower allows you to reach tight, enclosed edges and is equipped with Intelli-Cable management, sending the cable from side to side during use so that it doesn't obstruct mowing. The six mowers in the range are suitable for gardens of all shapes and sizes, from 100m² to 500m², with two of the top range models featuring E-Drive, Edge-Max, Compact & Go and Intelli-Cable technology.

Black & Decker® 18v Hedge Trimmer

The 18v Lithium Hedge Trimmer is the lead product in the new range of nine Black & Decker hedge trimmers. This cordless model uses E-Drive technology so it is ideal for trimming over grown hedges and cutting through even the thickest branches. Holding charge for up to 18 months the lightweight 18v lithium ion battery provides you with the assurance that it is always ready for use and maintains full power throughout.

Using sharp silver angled blades for high performance cutting, the hedge trimmer has an ergonomic handle and safety handling switch ensuring comfort and security during use, and is always kept in position thanks to its optimum balance feature.

Black & Decker® Lithium Blower

Completing the range is the new 18v Lithium Blower with a comfortable soft grip handle for ease of use. The accelerating airspeed ensures maximum performance helping you make light work of shifting even the largest pile of leaves. Equipped with Lithium Ion technology this powerful product has the ability to clear up to 300 litres of leaves per charge.

Equally effective on wet leaves, it uses the leaf scraper to disturb big piles of leaves and pick them up problem free. The removable suction tube also means that you are able to reach awkward corners in your garden and can adjust the length to meet your height requirements. Once the garden is tidy the 18v Lithium Blower can be stored conveniently using its built in standing foot.
