Thursday, 7 June 2012

Kerching has recently introduced another new slots game to its online casino. The latest addition - Diamond Queen (<http://www.kerching.com/Games/Diamond-Queen/>) - has already proven to be a success with players as a result of the magical slots experience it offers. Along with the enchanted reel symbols and characters, the game also contains cash payouts that are out of this world.

Diamond Queen takes place in a magical courtly setting, where sorcerers can be found performing magic on gem stones. The Diamond Queen herself casts spells on the slots, turning the reels wild with the touch of her sceptre.

The new slots game also displays the royal's precious diamonds and jewels. Like Da Vinci Diamonds (<http://www.kerching.com/Da-Vinci-Diamonds/>) and Da Vinci Diamonds Dual Play (<http://www.kerching.com/Da-Vinci-Diamonds/Dual-Play/>), players are treated to reels which glitter and sparkle as they play. Yet in Diamond Queen, a pesky treasure hunter can be found with a map in hand searching high and low for riches to take away.

Within the Diamond Queen slots game, it is not only the hunter who has a chance to claim riches on the reels. Kerching members have a chance to achieve payouts through the main game packed with 20 paylines. When a player manages to achieve three or more symbols on an activated line, they are treated to an instant cash boost.

Diamond Queen slots also come complete with a lucrative bonus round - the Mystical Diamonds Free Spins Bonus. This enhanced version of the standard mini-game gives slots fans an increased opportunity to win payouts as Stacked Wilds are activated throughout the bonus. What's more, players are awarded three goes, which gives them a chance to boost their account for free.
