As the nation continues to feel the squeeze, homeowners across the nation are seeking new ways to save money at home. In an attempt to help the planet and save on energy bills, many are choosing to invest in double glazing. The team at www.doubleglazingprices.net (<http://www.doubleglazingprices.net>) outline the benefits of installing double glazing in the home, not only to reduce carbon footprint but also gas and electricity bills.

According to reports, 43% of all greenhouse gas emissions are as a result of inefficient homes. Looking to help low income families make home improvements to ensure their home is more energy efficient; the government has backed the Green Deal programme. Subsidies will be given to households who cannot afford to make the improvements and then the money will be paid back out of the savings from energy bills.

Installing double glazing insulates the home by trapping air between layers of glass. The trapped air works as an insulator and reduces the loss of warm air escaping from the home. In turn, homeowners will reduce the amount they use their boilers and radiators and as a result, energy bills be decrease.

This comes as news of the ears to homeowners who have suffered from rising energy costs and what's more, Double Glazing Prices is looking to help customers save money on initial installation prices too.

The innovative quote system in place online at DoubleGlazingPrices.net offers customers the opportunity to find the best possible prices from local suppliers. The team will scour customers' local areas for the most trusted suppliers, each of which hold a FENSA or CERTASS qualification, proving their worth in the industry.

DGP works hard to balance low prices and premium quality so that customers can rest assured that they are getting the best possible service. The team are always happy to help and will inform customers on all they need to know regarding benefits of double glazing, energy efficiency and how to save money on energy bills.
