

# KYOCERA Document Solutions launches the TASKalfa 2550ci

Submitted by: Kyocera Document Solutions (UK) Ltd

Monday, 18 June 2012

---

The new TASKalfa 2550ci will appeal to teams who need excellent colour quality, reliability and advanced digital capabilities. It extends the TASKalfa range's celebrated production quality and easy operation to offices of all sizes.

This 25ppm, A3 colour multifunctional projects a premium corporate image, delivering rich colour consistency, extra sharp contrast and outstanding reproduction of charts, presentations and flyers.

It is as impressive with digital documentation as it is with the printed page. Its ability to scan directly into PDF format, to incorporate advanced compression and encryption and to send documents to email recipients, network locations, USB sticks or even FTP sites identify this device as a digital powerhouse for ambitious workgroups.

Anup Rai, Product Marketing Manager, KYOCERA Document Solutions UK (<http://www.kyoceradocumentsolutions.co.uk>), says "The TASKalfa 2550ci (<http://www.kyoceradocumentsolutions.co.uk>) exemplifies the level of product customers can expect from KYOCERA Document Solutions. It builds on the success of the award-winning TASKalfa 250ci, combining excellent colour quality, document handling and reliability with support for document security."

Although extremely capable in its standard form, the TASKalfa 2550ci can be enhanced to include user authentication so documents are only released to the correct user, protecting confidentiality. Other options include the secure erasing of stored data.

The TASKalfa 2550ci shares the same impressive colour touch-screen control panel as other TASKalfa devices, easing its introduction into organisations with established KYOCERA fleets and helping new and established users perform advanced tasks quickly and intuitively.

By incorporating HyPAS (Hybrid Platform for Advanced Solutions), KYOCERA's open software development platform, the TASKalfa 2550ci inherits the same application compatibility as the rest of the TASKalfa i series allowing workgroups to migrate seamlessly from paper documents to digital with optional functions such as one-click Scan-To-Me.

It also features numerous innovative functions. If the required paper is not available to print a document, Job Skip shuffles it to the end of the print queue and the device continues with jobs it can print. If colour toner runs out Monochrome Print keeps the office running by automatically switching to black and white.

The TASKalfa 2550ci's compact size suits the space constraints smaller teams often face. For example, the optional stapling finisher attaches to its side, taking far less space than floor-standing finishers.

Graham Cox, Sales Director, KYOCERA Document Solutions UK summarises the importance of the TASKalfa 2550ci: "The 20-30ppm sector is a critical part of the colour multifunctional market. With the TASKalfa

2550ci, KYOCERA Document Solutions is demonstrating that we can give people the capabilities they normally associate with high-end multifunctionals at a price associated with less intelligent devices.”

#### About KYOCERA Document Solutions

KYOCERA Document Solutions is one of the world's leading office document solutions companies. Its product range includes ECOSYS printers, reliable TASKalfa and SmartMFP multifunctional devices and is complemented by supplies, software and services. KYOCERA Document Solutions provides innovative products, built on a foundation of long-life components, allowing it to offer low total cost of ownership and high efficiency in any workplace.
