

NETGEAR's WNDR4000 N750 dual-band router lands 'Best Buy' award

Submitted by: Berkeley Global

Tuesday, 3 July 2012

The WNDR4000 (<http://www.netgear.co.uk/home/products/wirelessrouters/high-performance/WNDR4000.aspx>) is credited by Expert Reviews for its high performance and wealth of options for advanced networking.

Global networking company NETGEAR (<http://www.netgear.co.uk/>) has received the 'Best Buy' award for its WNDR4000 (<http://www.netgear.co.uk/home/products/wirelessrouters/high-performance/WNDR4000.aspx>) N750 dual-band router from leading online IT publication, Expert Reviews. The treasured 'Best Buy' award is reserved only for 'products with outstanding quality and performance for the money'.

In the review, Expert Reviews stated: "Not only does the WNDR4000 (<http://www.netgear.co.uk/home/products/wirelessrouters/high-performance/WNDR4000.aspx>) look good, it performs well too, and has a theoretical top speed of 450Mbit/s using the 5GHz band and 300Mbit/s using the 2.4GHz band. Looks and organisation aside, the WNDR4000's (<http://www.netgear.co.uk/home/products/wirelessrouters/high-performance/WNDR4000.aspx>) web interface does provide plenty of options for expert users, such as the ability to operate the router as a wireless distribution system (WDS) base station or repeater, a content filtering system to block undesirable websites and dynamic DNS."

The team at Expert Reviews concluded: "Its transfer speeds when using the 5GHz band - or when using either band with the WNDA3100 Wi-Fi adaptor - are excellent, as are its network storage functions. Excellent Wi-Fi performance, plenty of options and a built-in media server make this a Best Buy."

NETGEAR's WNDR4000

(<http://www.netgear.co.uk/home/products/wirelessrouters/high-performance/WNDR4000.aspx>) opens up a wealth of connectivity options for consumers, whether used as a standalone or to extend the functionality of a current ADSL product.

Rob Wells, director, Retail Business Unit, NETGEAR, said: "At NETGEAR we are extremely proud of our range of WiFi routers and we are delighted to have Expert Reviews' endorsement. With its built-in media server and in-depth options for advanced networking, the NETGEAR WNDR4000 (<http://www.netgear.co.uk/home/products/wirelessrouters/high-performance/WNDR4000.aspx>) makes fast, flexible internet connectivity an affordable reality for UK households."
