Pre-built integration between Computop Paygate and hybris Commerce enables hybris clients to implement a robust global payment platform quickly and easily

New York – July 31, 2012 – Computop, a leading payment service provider (PSP), today announced that it has joined the hybris Extend partner program, which provides access to certified integrations to help hybris customers accelerate time-to-value. As a hybris Extend partner, Computop has built a ready-to-use extension to its Computop Paygate payment platform that enables hybris Commerce clients to rapidly benefit from country-specific and global payment preferences coupled with effective fraud prevention solutions to drive global sales.

The Computop Paygate hybris Extend integration is easy to implement, saving merchants time and money. It provides retailers with a sophisticated payment platform that includes:

- Global Card Processing
- eWallet Transaction Processing through Paypal, ClickandBuy and Checkout by Amazon
- Country Specific Payment Methods (including Direct Debit, iDEAL, EPS, Sofortüberweisung, giropay)
- Guaranteed Invoice and Payment by Installments (Klarna, BillSAFE)
- Mobile Payments (mpass)
- Payment Guarantees for various payment methods (including Verified by Visa and MasterCard SecureCode)
- Sophisticated Fraud Prevention
- Tokenization
- Address and Credit Checks with Risk Management Solution (European credit agencies)
- Consolidated Merchandise Management System for all transactions
- Payment data is processed by Computop Paygate, which is PCI DSS 2.0 level 1 compliant

“By adding the Computop Paygate pre-built integration to our hybris Extend marketplace, our clients benefit from access to a robust, secure multichannel payment platform that consolidates all transactions and that can be rapidly implemented at a low cost,” said Patrick Ferdig, Director of Global ISV Partnerships for hybris. “In addition, Paygate enables our clients to offer their customers payment methods native to their respective countries, which helps to demonstrate commitment to their local markets and to drive conversions.”

“Computop and hybris have the same goal: to provide the strongest, most sophisticated platform to help retailers support multichannel sales worldwide,” said Ralf Gladis, CEO of Computop. “Our combined solutions provide merchants with a seamless way to support their global commerce strategies.”

The Computop Paygate extension is available immediately for hybris version 4.5 and up at <http://hybris.com/product/hybris-extend/computop>.

About the Computop Paygate platform

Computop Paygate 5.0 is a multichannel payment platform that provides online retailers with secure payment solutions and efficient fraud prevention for international markets. With just one interface needed, Computop Paygate allows online retailers to get access to dozens of international payment systems, and includes fraud prevention for North America, Europe and Asia. Leading e-commerce solutions from the likes of Demandware, hybris, Magento and Oxid all support Computop Paygate as a preferred payment service solution for global payment processing. In addition, Computop Paygate has been integrated into SAP's Business ByDesign business software to provide secure global payment processing.

About Computop

Computop is a payment service provider (PSP) that was founded in 1997 and is headquartered in Bamberg, Germany. The company has global customers such as Fossil, C&A, Samsung and TUI and has offices located in North America, Europe and China. Computop's Paygate PCI-compliant hosted payment solution supports all non customer present payments, including telephone, online and mobile.
