

Nuage Manuka Honey Skincare Range Launched – ‘Bee’ Beautiful on a Budget

Submitted by: Ad Hoc-PR

Wednesday, 22 August 2012

The Nuage Manuka Honey range is taking the sting out of affording the beauty benefits of New Zealand's unique Active Manuka Honey, by offering luxurious skincare at a competitive price.

Valued for its healing properties by generations of New Zealand's indigenous tribespeople, Manuka Honey's antibacterial effects are rated by the 'Unique Manuka Factor' or UMF, with a content of 10 or more considered suitable for therapeutic skincare. The Nuage range contains Manuka Honey UMF10+ and a range of active ingredients to provide intensive 48 hour moisturisation.

The soothing, non-greasy Nuage Manuka Honey formulations also contain Shea Butter, Vitamin E and TEGO® Smooth. Providing long lasting skin hydration, the range also enhances skin softness and elasticity. Nuage Manuka Honey skin lotions have a deliciously delicate honey scent and are paraben free, easily absorbed and suitable for all skin types.

Nuage Manuka Honey Body Lotion (150ml) and Nuage Manuka Hand & Nail Cream (100ml) cost £5.99 RRP and Nuage Manuka Honey Face Cream costs just £9.99 RRP. Available from a range of pharmacies including Home Bargains, for further information, visit: <http://www.fmcgltd.com/brands/nuagemanuka.shtml>

The innovative Nuage range is produced in the UK by FMCG a trading division of Swirl Products Ltd, one of the UK's leading suppliers of branded toiletries and personal care products.
