

WORLD RENOWNED CISSP® TRAINER, CLÉMENT DUPUIS TO EMPOWER AMBITIOUS UK IT PROFESSIONALS AT LONDON BOOT CAMP

Submitted by: Espion Group
Wednesday, 29 August 2012

Leading information security specialist, Espion is spearheading excellence in IT security training with a Certified Information System Security Professional (CISSP®) Boot Camp hosted by the internationally recognised and uniquely qualified instructor, Clément Dupuis.

For IT security professionals looking to excel in their careers by becoming CISSP® certified, the Boot Camp, which takes place from 17-21 September 2012 at the Park Plaza Sherlock Holmes, London, is an opportunity to take advantage of Dupuis's unrivalled experience. In addition to teaching more CISSP®s than anyone else in the world Dupuis owns and maintains the information security website CCCure, which is widely considered the leading portal for CISSP® exam preparation.

Dupuis will share fascinating insights from his career spanning more than 20 years as a Communications and IT Security Specialist in the army signal corps for the Canadian Department of National Defence (DND). Most recently he has been carrying out security assessments and penetration tests for Fortune 500 companies and can speak with authority on Information Security from his own insight and experience.

Dupuis says: "A CISSP® certified IT professional is an effective weapon against the ever evolving threats to information system security. New terms such as Advanced Persistent Threats (APT), "denial of service" (DoS) attacks and a focus on "insider" threats from disgruntled employees have all stepped into the limelight. My goal is to make sure IT security professionals attain the skills required to cope with these insidious developments."

Espion trainees enjoy a 90 per cent success rate in CISSP® exams and the company has tailored the Boot Camp to prepare students for the highly demanding and all-encompassing CISSP® examinations. Students will gain in-depth practical applications of the theory covered in the ten Domains of the Common Body of Knowledge and can leverage this new practical knowledge and experience in their daily work. The Boot Camp promises to be mutually beneficial to both organisation and student.

The price per delegate is £1,799. For more information or to secure a booking contact Mark Wiley, Research and Training Manager at Espion on T: +44 845 050 1711 or visit www.espiongroup.com.

About Espion's five day CISSP® Boot Camp

This Boot Camp prepares candidates for the CISSP® exam which is run by the International Information Systems Security Certification Consortium known as (ISC)². This five day review Boot Camp will be intensive and will answer all of queries about the KEY topics of the ten domains of the Common Body of Knowledge. Please note that the Certification exam is not included in the training. The training is Split into 10 Domains that will be covered across the 5 days. The Domains are:

- Access Control
- Telecommunications and Network Security
- Information Security Governance and Risk Management
- Software Development Security
- Cryptography
- Security Architecture and Design
- Operations Security
- Business Continuity and Disaster Recovery Planning
- Legal, Regulations, Investigations and Compliance
- Physical (Environmental) Security

In an accelerated but thorough way, this training covers all of the key topics set out by (ISC)² in the Common Body of Knowledge. Attendees will be encouraged to interact and engage with the instructor and with each other in order to ensure a unique learning experience for all. The instructor will provide real life practical examples to illustrate key concepts. This course is designed to provide an intensive and complete preparation to ensure that delegates pass the (ISC)² CISSP® examination at the very first attempt.

Who the Boot Camp is aimed at:

- CISOs
- CSOs
- Senior Security Engineers
- Members of the Information Security Team

- IT Management
- IT Professionals
- Network Administrators
- Senior Security Engineers

What is included:

- Five full days of training
- A copy of Shon Harris's "All in One Book" 5th edition
- Access to Clément Dupuis's database of practice exams - www.freepracticetests.org
- Direct assistance from a Master of the CISSP® certification both during the course and also after the course (via email)
- A certification of attendance
- Lunch and refreshments provided each day

Instructor: Clément Dupuis Biog

Clément Dupuis has taught more CISSP®s than anyone else in the world to date and maintains the information security training website CCCure. In addition to his academic life, Clément brings a vast amount of practical industry knowledge to the classroom. Clément served for over 20 years as a Communication and IT Security Specialist in the army signal corps for the Canadian Department of National Defence (DND). These days while in between mandates and classes, Clément does security assessments and penetration tests for Fortune 500 companies.

About CISSP®

CISSP® is an information assurance professional who defines the architecture, design, management and/or controls that assure the security of business environments. The vast breadth of knowledge and the experience it takes to pass the exam is what sets the CISSP® apart.

For those building a career in information security, the CISSP® certification is a necessity. The CISSP® certification provides information security professionals with an objective measure of competence, while being a globally recognised standard of achievement. The certification covers critical topics in security today, including cloud computing, mobile security, application development security, risk management and more.
