

GREAT CHRISTMAS IDEA: GIFT AN ONLINE PHOTOGRAPHY COURSE - INSTANTLY

Submitted by: MyPhotoSchool

Thursday, 4 October 2012

A Christmas gift of a photography course with some of the world's best photographers is just a click away as MyPhotoSchool launches a unique online gift certificate

MyPhotoSchool, the online school photography school with personal tuition from the world's top photographers, has today launched gift certificates for each of its online photography courses, in time for Christmas. This makes it possible for people to buy a course right up until the moment they see their loved ones on Christmas Day.

The beauty of a course from MyPhotoSchool is that the world's most acclaimed photographers teach students popular photography topics, ranging from macro photography or low light photography; child photography and pet photography; bird photography, architecture and flower photography; travel photography and child photography; taking beautiful landscape photographs, and everything in between. This makes it possible to find a gift for everyone, from the most discerning photographer to the keen photography enthusiast to someone simply looking for a great new hobby.

Those wishing to buy a gift certificate for loved ones simply need to choose the online photography course they would like from the MyPhotoSchool website and click through to the individual course page. In addition to a course overview, details about the course tutor and a taster video, visitors will find a 'Gift this Course' button. The button leads buyers through the very simple ordering and payment process, and provides a printable certificate with an online code that enables recipients to book any course to begin at a time that suits them.

All MyPhotoSchool courses cost £145, last four weeks and begin on the first Saturday of every month. The beauty of MyPhotoSchool photography courses (<http://www.my-photo-school.com/courses>) is that you meet experts in the comfort of your home. Each course includes step by step video tutorials, downloadable course notes, and the facility to chat with tutors and fellow classmates online, in a 'virtual classroom'. The classroom may be 'virtual' but the camaraderie is real, and the technology is very intuitive and easy to use.

All of the MyPhotoSchool tutors are outstanding in their field (and studio), being accomplished photographers and acclaimed photography writers. Courses cover everything from getting to grips with the equipment, understanding light and exposure, perfecting composition, professionally editing and making money from photography. Tutors at MyPhotoSchool, include world renowned wildlife photographer Heather Angel, former president of the Royal Photographic Society (RPS); David Handley, Sony Fashion Photographer of the Year; Phil Malpas, professional photographer and author of colour photography best sellers; Nigel Hicks, Associate of the British Institute of Professional Photography (BIPP), professional photographer and author; Tony Worobiec, Fellow of the Royal Photographic Society, founder member of Arena, journalist and author; and Paul Harcourt Davies, professional photographer, author and conservationist. For more information on all of the MyPhotoSchool tutors and the courses that they teach, please go to:

<http://www.my-photo-school.com/courses/>

MyPhotoSchool also provides a free photography website and a monthly themed competition for members registered to its website, with prizes available. Please go to <http://www.my-photo-school.com/> for more

information.

About MyPhotoSchool

MyPhotoSchool Ltd is a global online photography classroom. Whether you are a novice, a hobbyist or an aspiring professional, MyPhotoSchool has an online photography course to inspire you. At MyPhotoSchool, world class photographers can teach you everything there is to know about photography: virtually. From back yard to big game photography; from black and white photography to discovering colour; from low light to understanding light, as well as how to take beautiful baby, wonderful wedding, perfect pooch and fantastic flower photos.
