

KYOCERA Document Solutions launches high performance printers

Submitted by: Kyocera Document Solutions (UK) Ltd

Monday, 15 October 2012

KYOCERA Document Solutions introduces the FS-C8650DN and the FS-C8600DN which offer fast and flexible printing solutions for large and demanding workgroups. The printers deliver:

- Lower speed/cost offering at 45ppm to complement the high speed 55/50ppm (mono/colour) device
- Best (most flexible, highest capacity) optional paper handling on the market – 8 sources up to 7,650 sheets
- Job skip function enables automatic prioritisation of print jobs
- Enhanced finishing including banner printing/tri-folding/hole punching on either finisher
- High performance controller with 160 GB HDD as standard
- Long-life drum and developer lasts for 600,000 pages

Rachel Dean, Product Marketing Manager said: “The FS-C8650DN and the FS-C8600DN are based on award-winning technology and as a result offer high performance, full colour printing and superior paper handling capabilities for a wide variety of paper formats, including A3+ and banners up to 120cm long and the printers have an input capacity of up to 7,650 sheets which is unmatched in the 45+ppm printer segment.”

With outstanding flexible paper-handling capabilities the FS-C8650DN and the FS-C8600DN offer the highest paper capacity as well as the most flexible paper handling options of any printer in the segment. Both printers can handle up to 8 different paper sizes and media types, including coated and uncoated paper, labels and a range of paper weights. Additionally the printers offer an output capacity of up to 5,000 sheets and a range of finishing options, including stapling, punching, booklet stitching and tri-folding.

In addition to their flexible paper handling capabilities, the FS-C8650DN and FS-C8600DN deliver high quality printing at high speeds with 100% duplex productivity. Large print jobs can be handled without interruptions, as the paper trays with their large input capacity don't need to be continuously refilled. The printers come with a high performance controller and 160GB HDD as standard for straightforward document management.

As ECOSYS printers, both devices have a very low Total Cost of Ownership (TCO). This means that the cost of the product throughout its lifecycle – purchase, operation and resale – is the lowest in its class. KYOCERA achieves this by using long-life components in all ECOSYS products, including the drum and developer that last for up to 600,000 pages. This helps to keep the TCO for both the FS-C8650DN and FS-C8600DN competitively low.
