Danaos and Akeydor Limited establish Partnership for the UK maritime industry, to implement and support Danaos Maritime Applications in the UK

Danaos Management Consultants, developer of the leading Global Danaos Maritime Applications, and Akeydor Limited, the London based leading Software provider, announced today that they have formed a strategic partnership to bring the Danaos Maritime Applications to the Maritime Industry in the UK.

Akeydor Limited, the London-based Software Supplier of Remote Control, Help Desk, Education and Asset Management Solutions, will work with Danaos to address the day-to-day needs of Danaos users in the UK through its Danaos-specific Support Department. As a leading Software Company, Akeydor Limited renders its products to hundreds of clients today, assisting them to increase IT efficiency and save in energy and operational costs. The focus on Danaos Maritime Applications will assist Ship-Owners, Ship-Management Companies and Ship Brokers to implement State-of-The-Art Commercial, Financial, Technical, Procurement, Crewing, HR, Quality and Communications modules in one fully integrated and seamless Maritime Application Suite with tremendous capabilities for the Industry.

Danaos Maritime Applications include The Commercial Suite for vessel, freight, port, bunkering and lay-time, The Technical Management Suite for the maintenance of the vessel, The Procurement Suite for records and monitoring spares, provisions and stores, The Financial Suite for accounting, budgeting and payments, The Crewing Suite for crewing and HR, and lastly the Quality Suite with ISM and Risk Assessment modules. In addition, Danaos offers the Best-of-breed in Communication Technology, Info@Gate, the complete E-Mail & Communications solution for Internet-mail, InterOffice-mail and all other possible forms of modern communications, that is also accessible through smartphones and tablets. The uniqueness of Danaos Applications is its ability to fully integrate all modules in one Master Maritime Suite through which all the daily activities of vessel and shore operations are being monitored and administered in an efficient and productive way. Information is entered only once at the point of origin (either ashore or onboard) and, thereafter, it is shared seamlessly amongst all relevant vessels, shore departments and third parties in a fully automated and transparent manner.

Akeydor's Applications include the award winning CrossTec Solutions in Secure Remote Control of PCs, Servers and Mobile Devices, Web based IT Help Desk, IT Asset Management and Educational Solutions which assist organizations to administer their internal network and increase their efficiency and productivity. Akeydor's new developments with Danaos will focus on the Maritime sector in England offering best of breed technologies to the Industry.
