Wake up with a buzz! - Introducing the Wake-Up Vibe

It looks like a funky alarm clock, and it is. But this gorgeous little gadget won't wake you up with a persistent beep, beep, beep, beep....

The utterly unique feature of this invention is the vibration function! Yes, that's right, you can now wake up to buzz, buzz, buzz instead!

The Wake-Up Vibe is very easy to use, with a clear display and simple controls. Just like an alarm clock, set your desired wake up time. Then it's just a case of deciding what sort of vibration (there are 6 patterns) and intensity you want to wake up with. What a great way to start a day!

The shape has been designed to fit perfectly to the female form, so it can be left in place comfortably (externally) during the night. The hypoallergenic silicone skin is super-silky to the touch and easy to keep clean. The manual function means it can be used as a simple massager, alone or with a partner, and its rechargeable battery guarantees you good vibes when you need them.

The unique combination of form and function has already got it noticed. During the past few weeks, the Wake-Up Vibe has picked up a Dutch design award (GIO) and the award for Most Innovative Product at the Erofame adult trade fair in Hannover.

Marketing manager for manufacturers Concepts Of Love, Eric Wieffering, envisages a bright future for the new product. "In 2009 we started with the development of the Wake-Up Vibe. It was increasingly evident that we had something unique on our hands. We have therefore invested plenty of time in research and production.

"We have worked closely with the University of Technology in Delft. Quality was paramount and we saw the results of this collaboration instantly. It's great to get the design awards, but we are confident that this product will also be a hit with the consumer."

Available in black, pink, or violet - the Wake-Up Vibe is available exclusively from pabo.com
