

# TENTE launches LINEA e-lock

Submitted by: pr-sending-enterprises

Thursday, 10 January 2013

---

TENTE has launched an advanced version of the LINEA product recognised by the leading hospitals around the world. It has taken the feedback from numerous hospitals testing the products from the LINEA family in various countries and created the innovative LINEA e-lock that makes the running of day-to-day tasks in the medical sector even smoother.

LINEA e-lock is an electronically controlled hospital bed castor with integrated powered locking system. Actuation of the LINEA e-lock is easy and quiet, which is of so much importance for the hospital environment, and can be done by remote control or on the control panel of the application itself. In the event of a power outage, the castors can easily be unlocked by hand.

Thanks to the built-in electronics, the castors (<http://www.tente.co.uk/>) can be controlled individually or all at the same time. It allows users to achieve the required locking mode without any physical effort and at any time.

Even though the revolutionary concept of LINEA e-lock was created with the medical sector in mind, it has proven to be of significant innovative value for the fields of design and engineering as well. Since this product does not contain any mechanical components, it can be adapted to any new or existing applications. This results in more safety and flexibility for designers and engineers.

But it's not just the LINEA e-lock that's inspiring. All products in the LINEA family are outstanding in both their performance and handling characteristics, allowing customers to create a total design concept.

About TENTE:

TENTE CASTORS Ltd. is a subsidiary of TENTE International GmbH located in Cologne, Germany.

Since 1923, TENTE Castors has been working in Bergische Land to improve an invention, which has moved man for five thousand years: The wheel. The history of the firm began in 1923 with the sale of ball castors and wheels for sliding cupboard doors in the town of Wermelskirchen.

TENTE is now Europe's largest manufacturer of castors & wheels. TENTE castors are proven and used by many original equipment manufacturers of branded products all over the world.
