CACI Microlift: The at home anti-ageing device that will turn back the years

CACI, the world leaders in non-surgical face lifts introduce a never seen before at home facial toning device – the CACI Microlift, designed to re-educate facial muscles and combat the signs of ageing with instant results.

This unique hand held device targets the entire face including the forehead, eyes, brows, cheeks, jawline, lips, chin and neck to lift facial contours and reduce wrinkles. The quick 10 minute treatment is easy to use, compact, light and portable.

Until now the CACI Non-Surgical Face Lift has only been available in 5000 of the world's most prestigious professional beauty salons, treatment clinics and spas, and now following three years of intense development this celebrity favoured treatment allows you to experience CACI's expertise in facial toning in the comfort of your own home. CACI Microlift is the perfect introduction to CACI technology and for those wanting to enhance and maintain CACI salon treatments.

Other anti-ageing gadgets commonly use high power currents to cause involuntary muscle contractions which can actually make lines and wrinkles worse; Whereas CACI Microlift uses the same low frequency electrical impulse technology that is used in CACI's professional systems. CACI Microlift works in harmony with the body's bio-electrical field, using a unique patented muscle gripping action to naturally re-educate, strengthen and tone the facial muscles and improve skin texture.

For best results a course of twelve CACI Microlift treatments is recommended – At intervals of 3 x 10 minute treatments per week leaving a day between each treatment.

Results are maintained through the continuation of regular CACI Microlift treatments

CACI Microlift will lift and tone facial contours, improve skin texture and reduce wrinkles for a youthful complexion with minimal effort.

Stockist details:

CACI Microlift costs £350 launching in February 2013 online at www.cacimicrolift.com, John Lewis, Harrods and through CACI salons nationwide
